

## Cineo ETC Show Files – Quick Start Notes

For the ladder light show file, ladder lights should be addressed as follows:

Translight stage right to stage left:

Ladder 1: 1-24

Ladder 2: 25-48

Ladder 3: 49-72

Ladder 4: 73-96

Solo Ladder Light should be addressed at 201

These patch notes are also written on the magic sheet. And both of these shows can be run independently from the magic sheet interface.

For the LB800 Demo the “Hero” unit running the effects should be addressed at 1. If you are showing of another unit via DMX that should be addressed at 41.

When you start up the show files run snapshot 1 (ctrl + s) to configure the screen or choose Snapshot 1 from the snapshot popup in the upper right corner of the screen, see graphic below.
